The Region's Changing Population

uring the 1990s, the population of the Pioneer Valley region grew by nearly one percent. This modest growth coincided with increasing urban sprawl. The population of the region's most urbanized areas either declined or remained fairly stable while substantial growth occurred in outlying communities.

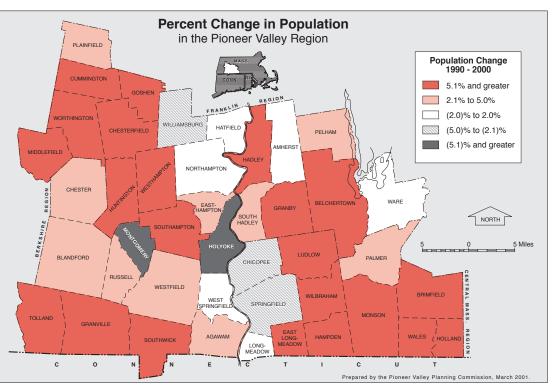

The three largest cities, Springfield, Chicopee, and Holyoke, each experienced population declines. In aggregate, their population declined by 10,746, or 4.2%. In sharp contrast is Belchertown's experience, which grew by 2,389 residents, or 22.6%. Southwick, another rural community, grew by 1,168 residents, or 15.2%.

The map below depicts the pattern of population growth and decline. Note that the areas of growth, represented by the two red shades, are generally outside of the most urbanized areas of the region.

As expected the region's Latino population grew substantially, by 51.3%. This was even greater than the statewide rate of 49.1%. While the bulk of this growth occurred within the region's urban core (20,467 of the 25,457 new Latino residents), significant increases occurred in many places throughout the Valley. Agawam, Amherst, Ludlow, Northampton, Westfield, and West Springfield are among those communities with the greatest gain of Latinos.

Unfortunately, it is not possible to report population changes by racial categories. Census 2000 was the first census allowing respondents to identify with more than one race. During previous censuses, respondents were restricted to selecting one race. Thus, one cannot determine to what extent the population difference for any race is a result of a change in population rather than the difference reflecting additional races being selected by long-time residents.

The data reported in this publication is from the first Census 2000 data to be released. Over the next few years the U.S. Census Bureau will continue releasing the results of Census 2000, each release coming with greater detail. A schedule of planned releases from Census 2000 is at http://factfinder.census.gov/ home/en/releaseschedule.html.

Sources: 1990 U.S. Census of Population and Housing Summary Tape File1A and 2000 U.S. Census of Population and Housing Public law 94-171 Data. U.S. Census of Population and Housing Public Law 94-171 Data.

Note: Departing from previous federal censuses, the 2000 census permitted respondents to select more than one race. Because a white-Asian will be reported twice, as both a white and an Asian, the sum of the population for each race will exceed the total population. As reported above, the *minimum* reflects the number of persons selecting only that race. The *maximum* includes all persons selecting that race.
