

SMART GROWTH COMMUNITY CHECKLIST

Town of South Hadley

This checklist is designed to assist the Town of South Hadley in implementing Valley Vision Smart Growth Strategies at the local level. As part of the Valley Vision Memorandum of Agreement, each community committed to review existing zoning and subdivision regulations to determine if they are consistent with Valley Vision, as well as consider the adoption and enforcement of land use regulations designed to promote efficient growth consistent with Valley Vision. This checklist has been developed to assist your

community in these tasks.

The checklist can also be used to assist your community in increasing its Commonwealth Capital Score. Commonwealth Capital is a policy developed by the Commonwealth of Massachusetts to encourage communities to implement smart growth within their land use regulations as part of the evaluation of proposals for state funding programs. The most recent Commonwealth Capital Score in the Town of South Hadley was 81 points in FY08. The maximum number of points a community can score is 140. Based on recommendations in your community land use plans, implementation of key smart growth policies will also improve your community's Commonwealth Capital Application score.

The Smart Growth Strategies in Valley Vision provide a menu of smart growth options a community can select from, depending on the size and character of your community. While not every strategy fits every community, you will find that many strategies are a good match for your community. The options that are highlighted in this checklist are based on the goals and objectives South Hadley residents identified in its municipal plans, such as Community Development Plan, Open Space and Recreation Plan and Commonwealth Capital Application. Additional recommendations have also been provided by PVPC, largely on new zoning tools that might not have been considered in previous planning efforts.

At this time, South Hadley has implemented eleven (11) Smart Growth Strategies highlighted in the regional land use plan, Valley Vision. Based on strategies identified in your community plans, as well as recommendations made by the Planning Commission based on Valley Vision, your community could consider implementing seventeen (17) additional smart growth strategies in the future.
