PREFACE

The Pioneer Valley Region

The Pioneer Valley Region is comprised of 43 cities and towns covering approximately 1,180 square miles. Home to over 600,000 residents, the Pioneer Valley is the fourth largest metropolitan area in New England. The following map references the Pioneer Valley Region and displays an outline of the principle highways throughout.

TIP Format and MPO Endorsement

The FFY 2009-2012 TIP has been prepared with completely separate components of the document that are subject to federal review and approval and components that are not. This distinction of a "federal component" was the firm position of the Executive Office of Transportation and Public Works(EOT) as a means to avoid potential problems with adequately satisfying federal financial constraint requirements with the non-federal aid component of the TIP. Although a non-federal component of the TIP is represented, it is understood that this component is not subject to Metropolitan Planning Final Rule 23 CMR 450 section 324, therefore federal review and approval is not required.

The non-federal component is provided for the benefit of the MPO and the constituent communities as a representation of an agreed upon listing of improvement projects to be undertaken entirely with state provided resources. All projects included in the NFA section of the TIP must be eligible to receive federal funds and be located on a functionally classified road. The separation of federal aid projects from non-federal aid projects by no means represents a lack of commitment by the state to fund all projects specifically programmed in the document. Assuming that adequate funds are available from federal and/or state sources, it can be fully expected that the following project listings can and will be implemented over the FFY 2009-2012 time frame. Pending federal guidance approving the inclusion of non-federal aid projects without secured bonded resources in each year, the TIP will be amended to reinstate all non-federal aid projects into the document endorsed for federal review and approval.

EOT Commitment to Funding all Designed and Permitted Projects

The EOT has committed to funding all transportation improvement projects that will be ready for advertisement in FFY 2009 and beyond. In response to this commitment, Pioneer Valley local officials in cooperation with regional and state officials from the MassHighway department and the Executive Office of Transportation and Public Works have made a concerted effort to develop a TIP project listing that is truly representative of the projects that will realistically be ready for advertisement in FFY 2009-2012. Funding targets for the Pioneer Valley Region have been issued by EOT identifying potential resources for each year of the TIP.

I. GENERAL SUPPORT INFORMATION

INTRODUCTION

The Transportation Improvement Program (TIP) is a requirement of the Metropolitan Transportation Planning Process as described in the Metropolitan Planning Final Rule 23 CFR 450 section 324. This regulation developed by the Federal Department of Transportation defines the Transportation Improvement Program as:

"A staged, multiyear, intermodal program of transportation projects which is consistent with the metropolitan transportation plan."

The Pioneer Valley TIP is a four-year schedule of projects identified by year and location complete with funding source and cost. The TIP is developed annually and is available for amendment and adjustment at any time. Each program year of the TIP coincides with the Federal Fiscal Year calendar, October 1 through September 30. All TIPs and amendments are consistent with the goals and objectives of the Regional Transportation Plan for the Pioneer Valley region. This TIP is financially constrained.

All projects in the TIP come from the conforming 2007 Regional Transportation Plan. All regionally significant projects included in the TIP were previously included in the air quality analysis completed for the conforming RTP. Because projects in the TIP come from the conforming RTP, and all regionally significant RTP projects for 2009 through 2012 (both Federal and Non-Federal Aid) are programmed in the TIP, the same air quality analysis utilized for the RTP can be used for the TIP. Therefore, this TIP, in combination with the TIPs from the other MPOs in the nonattainment area, is found to be in conformance.

DEVELOPMENT OF THE TIP

The Pioneer Valley Metropolitan Planning Organization (MPO) is responsible for developing the TIP. The MPO is comprised of ten members including four independently operating agencies and six locally elected officials:

- Executive Office of Transportation (EOT);
- Massachusetts Highway Department (MHD);
- Pioneer Valley Transit Authority (PVTA); and
- Pioneer Valley Planning Commission (PVPC);
- Mayor of Chicopee
- Mayor of Holyoke;
- Mayor of Northampton
- Mayor of West Springfield
- Selectboard member from Belchertown;
- Selectboard member from Granville;

As the lead planning agency for the MPO, the PVPC accepts the responsibility for developing the TIP in a cooperative process with members of the MPO and the general public. The final TIP is voted on for endorsement at a formal meeting of the MPO. The endorsed TIP project listing is included in the State Transportation Improvement Program verbatim and requires endorsement by the Governor.

The MPO relies on a transportation advisory committee to carry out the cooperative process during TIP development. The Joint Transportation Committee (JTC) is a group of community appointed officials, MPO member representatives, public and private transportation providers, citizens, and special interest groups and agencies. The JTC establishes and recommends to the MPO procedures for submitting, prioritizing and selecting projects for the TIP. PVPC staff provides the technical support to conduct the TIP development activities for the JTC.

Below is a general outline of steps taken during the TIP development process.

- Project proponents (communities, MPO members, agencies) submit projects through the process outlined in Chapter 2 of the Massachusetts Project Development & Design Guidebook (2006)
- 2. Projects are prioritized based on an evaluation criteria by MPO staff, JTC representatives, and MassHighway District staff, and EOT staff at a posted meeting open to all.
- 3. The State (thru EOT) provides funding targets for the Pioneer Valley Region.
- 4. JTC reviews and recommends project priorities on the TIP to the MPO
- 5. Draft TIP project listings are prepared by the MPO staff are distributed for review and comment to MPO members
- 6. MPO meets to make final decisions on the composition of the TIP and to recommend the Draft TIP for general public release for no less than a 30 day review period
- 7. Final Draft TIP is distributed for review, consultation and comment in accordance with the adopted Public Participation Plan
- 8. Public meetings and news releases are conducted to promote public involvement and consultation.
- 9. Comments are compiled and addressed where appropriate
- 10. Final TIP developed for the JTC's consideration and their recommendation to MPO
- 11. MPO meets to vote on endorsement of the TIP
- 12. Endorsed Regional TIPs are compiled by EOT to create the State TIP (STIP)
- 13. Secretary of EOT endorses the STIP (on behalf of the Governor) and submits the STIP to federal agencies for review and approval
- 14. Federally approved STIP is ready for state implementation (project advertisement)
- 15. Amendments and adjustments to the TIP are made on an as needed basis with the additional public review and input for formal amendments only.

Congestion Management Program (CMP)

The Pioneer Valley Congestion Management Program (CMP) formerly the Congestion Management System (CMS) is an on-going, systematic process designed to improve transportation in the region by providing up to date information on the location, severity and extent of congested corridors and intersections. Findings of the CMP report are used to assist in the selection of projects to be Prioritiezed for TIP consideration, as well as assist in the prioritization of projects to be included in this document.

PROJECT PRIORITY CRITERIA AND SELECTION

The EOT developed a process and set of criteria to prioritize the region's TIP projects which was modified and endorsed by the MPO. All projects included in the TIP have been evaluated and assigned a priority value or rating (See Appendix D). This process is used as a management tool to identify projects of regional priority and program them accordingly in the TIP.

PRIORITY CRITERIA

A Project Information Form was developed in concert with the priority process and contains information for each project submitted. In addition to this, consultation with the project sponsors and the state provided information also used in the evaluation of each project priority rating. The priority rating was based on the following information:

- Identified in the RTP;
- Project Preparedness;
- Benefit Cost;
- Facility Preservation;
- Congestion Relief;
- Safety;
- Enhanced mobility;
- Air Quality/Environmental;
- Enhancement Activity; and
- Status of Design.

The Project Information Form and a detailed outline of the project priority evaluation criteria are presented in Appendix E.

PROJECT SELECTION AND PROGRAMMING

The project priority ratings were applied in conjunction with a project's anticipated advertisement schedule and with the funding targets provided by the state to develop the four-year program of the TIP. A project was not considered for scheduling in a year earlier than its anticipated schedule regardless of the priority rating. For projects that are expected to be ready to go in the first year of the TIP the top priority projects for that year were funded under the federal aid categories, since these funds are most secure. Once the federal aid funds were completely programmed, non-federal aid funds were programmed to priority projects. This initial assignment procedure was applied to each year of the TIP and is subject to change as the TIP is developed and refined by members of the MPO and the JTC.

AMENDMENT/ADJUSTMENT OF THE TIP

For the purposes of project selection and programming, amendment or adjustment to the TIP can be conducted at any time. Amendment of the TIP consists of addition of a project not previously programmed, the advancement of a Year 3 project through Year 4 or a significant adjustment to project costs. Amendment requires formal MPO action.

Program adjustments can be conducted without formal MPO action in order to minimize constraints on programming projects. Minor adjustments could include such actions as moving projects between

Year 1 and Year 2, and minor fluctuations in project description, costs and funding source. This action can be accomplished through an agreed upon administrative action.

DESCRIPTION OF FUNDING SOURCES

Interstate Maintenance (IM) - Resurfacing, restoration and rehabilitation are eligible activities for maintaining Interstate facilities. Reconstruction is also eligible if it does not add capacity. However, high-occupancy-vehicle (HOV) and auxiliary lanes can be added. Funding: federal - 90 %, state - 10 %.

Surface Transportation Program (STP) - This program is for the maintenance and construction of the federal aid system, all roads other than those functionally classified as local or rural minor collectors. Funds may also be flexed for use on bridge, transit capital, and bike or trail facilities. A minimum amount of 10 percent must be set aside for both safety construction activities and for transportation enhancements. The remaining STP balance is for use throughout the state. Funding: federal - 80%, state - 20%.

Surface Transportation Program Enhancements (ENHMT) - A portion of the Surface Transportation Program funding for enhancement projects chosen by states and localities. Funding: federal - 80%, state - 20%

Congestion Mitigation and Air Quality Improvement Program (CMAQ) - These funds are directed towards transportation projects and programs which reduce transportation-related emissions. These funds are to assist areas designated as nonattainment and maintenance under the Clean Air Act Amendments of 1990. These projects will contribute to meeting the attainment of National Ambient Air Quality Standards (NAAQS). Funding: federal - 80%, state - 20%.

Bridges - Funds the replacement or repair of structurally deficient or unsafe bridges in urban and rural areas. All bridges, both on and off the federal aid roadway system are eligible for funding. Funding: federal - 80%, state - 20%.

National Highway System (NHS) - The National Highway System (NHS) consists of major roads in the United States, including all Interstate routes, a large percentage of urban and principal arterials, the defense Strategic Highway Network (STRAHNET) and other strategic highway connectors. Typically, these facilities qualify for an 80 percent federal share, however, projects on Interstates may qualify for up to 90 percent federal share funds. Funding: federal - 80%, state - 20%.

Other Federal Aid - This category includes projects that received federal funding within the Federal-Aid Program and may include special demonstration project funding. Funding: federal - 80%, state - 20%.

In compliance with FHWA guidelines projects with federal earmarks are only programmed in the FY 2010 to FY 2013 TIP if the total funding is adequate for project implementation. The reaming earmarked projects will be included in appendix z for informational and tracking purposes.

High Priority Projects (HPP) High Priority Projects are congressionally earmarked projects that have been deemed as a high priority for the state were the project is located. Funding: federal - 80%, state -20%

Section 115 Funds Included in the Transportation bill as congressional earmarks, each year the earmarks are given a designated funding category. In FFY2005 the funding designation for these projects was Section 115 Funds. Funding: federal -100%, state -0%

Section 117 Funds Included in the Transportation bill as congressional earmarks, each year the earmarks are given a designated funding category. In FFY2006 the funding designation for these projects was Section 117 Funds. Funding: federal -100%, state -0%

Section 129 Funds Congressional Earmarks for FFY 2008. Funding: federal – 100%, state – 0%

Section 125 Funds Congressional Earmarks for FFY 2009. Funding: federal – 100%, state – 0%

Non-Federal Aid (NFA) - This funding category contains all those projects not receiving federal funds. Various categories of state funding are included in this group including bikeways, State Aid (Chapter 90), and highway construction and maintenance (Chapter 497). This category is included in the TIP for informational purposes only. Funding: federal - 0 %, state - 100 %.

Section 5309 Capital (SEC.09) - A discretionary grant program funding capital projects in urban areas that are considered major capital investments in public transportation and facilities. Funding: Federal - 80%, State - 20%

Section 5307 Capital (SEC. 07-CAP) - Eligible projects for Section 5307 (Capital) funds include the planning, acquisition, construction, improvement and operating costs of facilities, equipment, and associated capital maintenance items for use in providing mass transit service. The Federal match for Planning and/or capital assistance under Section 5307 is 80 percent of the net project cost, but a recipient is permitted to provide additional local match at its option. There are three exceptions to 80 percent Federal match for capital projects:

- 1. <u>Air Quality Benefit</u>. If an air quality benefit can be forecast for a project such as a bus purchase, the federal match is 90 percent. Larger state and local matches are allowed.
- <u>Elderly and Disabled Projects</u>. The federal match is 95 percent for any element of a capital project intended exclusively to enhance the accessibility and mobility of elderly and disabled persons and that is in excess of Federal requirements. All FTA-funded projects must be designed and implemented to meet the basic accessibility or mobility needs of elderly and disabled persons.
- 3. <u>Additional Service</u>. Capital expenditures for the increase in service can be funded with a 90% federal match.

Section 5307 Operating (SEC. 07-OPR) - Funds allocated under this category may be used to fund up to 50 percent of the operating cost associated with the provision of public mass transportation systems in urbanized areas.

Section 5310 - Section 10 pertains to transportation facilities meeting special needs of the elderly and disabled. Funds allocated under Section 16(b)(2) provide private non-profit corporations and associations with grants and loans to improve the mobility of the elderly and disabled. In Massachusetts, 16(b)(2) funds are administered at the state level by the EOT. These funds typically are used for the purchase of capital items, including lift-equipped vans. Mobility Assistance Program (MAP) funds are intended for use by public agencies, such as municipal councils on aging and the PVTA to provide van service to elderly and/or disabled persons.

Section 5311 - These funds are made available exclusively for public transportation projects outside the urbanized areas. Both capital and operating expenses are eligible.

Section 20 - Section 20 provides financial assistance for projects which address the human resource needs and conditions of the public transit industry. The federal share of eligible capital and project administrative expenses is not to exceed 80 percent of the net cost of the project. The federal share for state administration and technical expenses is 100 percent, not to exceed 15 percent of the state's total apportionment.

TRANSPORTATION SYSTEM OPERATING AND MAINTENANCE COSTS

The FFY 2010-2013 TIP is consistent with the Regional Transportation Plan (RTP) for the Pioneer Valley Region. Tables 1 and 2 presents the estimates outlined in the RTP of annual expenditures associated with operating and maintaining the transportation system. These estimates represent past expenditures and do not reflect costs associated with maintaining a constant level of system performance.

II. PUBLIC PARTICIPATION SUMMARY AND CHANGES

The DRAFT FFY 2009-2012 TIP underwent a public review and comment period consistent with the Pioneer Valley Region Public Participation Process. This began July 17, 2009 and continued for 30 days until August 17, 2009. During this time, comments were received from communities, JTC, PVTA, PVPC, MHD District offices and EOT. Below is a summary of the significant changes by year to the Draft TIP as result of the public review and comment period.

COMMENTS MADE REGARDING THE FFY 2010-2013 TIP:

Transit Comments

Comments by	Projis	Comment	Action	Date
		Add line in the Economic Stimulus section for Operating		
		Assistance equal to 10% of our ARRA funds (\$1,625,945).		
		Reduce the Van line item by the full \$990,000 that was		
		originally in the TIP and the Transit Security line item by		
		\$635,945 to reflect projects that will no longer be funded by		
		the federal dollars in this specific ARRA grant (MA-96-		
		X0002-00). It is our intention to fund the Vans (\$990,000)		
		and this portion of the Security projects (\$635,945) with		
		State funds being flexed from Highway funds to PVTA to		
	Transit	make up the 10% of ARRA funds that are now allocated to	Transit TIP	8/13/200

		Please consider West Springfield Connecticut Riverwalk and		
		Bikeway for the second round of ARRA funding	Comment	7/14/200
West Springfield	603730	(\$2,375,000)	noted	9
		The MPO should also be commended for its effort to advance regionally significant projects within the FFY2010- FFY2013 TIP. Here again, the mix of projects reflects attention to the need for transportation improvements within our urban centers, and on the vital connector routes to less densely populated communities as well. While it is unfortunate that no CMAQ funds will be available to the region, I do recognize that further development of commuter rail outside of our own region will provide benefits to the Commonwealth as a whole. We can only hope that other regions will be as ready to help us in future years, particularly as we plan for regularly scheduled commuter rail access to Hartford, Boston and Albany. In this regard, the Palmer (Depot Village) passenger rail station could provide an important embarkation point for travelers in the region. I hope that this opportunity will be addressed in planning	Comment	7/30/200
Ware		activities in future years.	noted	9
		I am also pleased that the MPO continues to support the proposed improvements to the Ware River Secondary Track. The impacts of the project, in terms of immediate job creation and long-term job retention, certainly make this project eligible for the proposed use of ARRA funds. The	Comment	7/30/200
Ware		short-line railroad is a vital transportation connector for a	noted	9

		number of industries along the Ware River Valley		
		corridor. More importantly, it provides major industries in Indian Orchard with a key link to Intermodal distribution facilities. I wholeheartedly endorse the inclusion of this project in the TIP.		
Senator Stephen M.	FRE -	I am writing on behalf of the Town of Ware (Contact: Paul Hills, Community Development Director, 126 Main Street, Ware, MA 01 082; Telephone: 4 13-967-71 36 EXT. 186) relative to its interest in obtaining economic stimulus funds for the Ware River Secondary Track. The Town of Ware is attempting to secure funding through the FFY2010 Element of the FFY 2010-2013 Transportation Improvement Program (TIP). As you may know, the Ware River Secondary Track is owned by the Commonwealth of Massachusetts and leases the rights of way to several corporations in the region. These companies are paramount to the future economic needs of the communities that they serve. Granting this funding would be beneficial to the area workers who would be employed by this project and the local businesses who depend on this track. I would appreciate your strong consideration of this matter at your earliest possible convenience and contacting the Town of Ware directly. It would also be appreciated if you would provide me with a copy of any correspondence that you may have with Mr.	Comment	7/31/200
Brewer	101	Hills in this regard. Add \$800,000 (section 122 funds) to Section 1C FY2013 for	noted Funding	9

		I just spent a few hours familiarizing myself with the draft TIP. Fascinating reading, both for what is included and what is not. Did I miss it, or are the requirements for a conforming transportation plan silent on the total populations' transportation needs and transportation-related CO2 emissions for the region? I presume public transportation is covered in some other report, but is the availability of public transportation a factor in assigning priorities for repairs and new construction? Is traffic flow and impact on vehicle miles driven a factor in deciding which bridges and roads to fix? Now that the courts have ruled that under the Clean Air Act DEP can regulate CO2 and other greenhouse gasses, is it permissible to look beyond ozone and VOC's in considering transportation impacts? Are innovative approaches to traffic flow such as 1) no idling zones, 2) traffic-actuated signal systems, 3) replacing stop signs with yield signs where safety considerations		
Davio Danielson Executive Committee Hampshire COG		permit, 4) park and ride programs etc. etc. allowable elements of a TIP? Overall, this TIP looks like business-as- usual, unrelated to the sense of urgency I feel about Climate	Comment noted	8/6/2009

		Disruption and the huge amounts of methane about to bubble		
		out of the so-called permafrost. Has the PVPC looked at		
		other approaches and options for making transportation in		
		the Valley more efficient and less impact on the		
		environment? Might it have plans to do so?		
		I wish to express comment, on behalf of Applewood at		
		Amherst and the resident community that resides here, on the		
		2010-2013 Transportation Improvement Program, project #		
		604043, Rte 116 Atkins Corner. 1. That state project		
		#604043, Rte 116 Atkins Corner for @439289 be funded		
		under Part 1A: Federal Aid Target Projects with Surface		
		Transportation Program (STP) funding instead of being		
		funded under Part 1C: Federal Aid Non – Target Projects		
		with Economic Recovery (ER) funds. This project is ready		
		to begin in FY 2010 should not be delayed for discussions		
		over funding the Atkins' Corner project. This project, as it		
		currently stands, is key to improving the current regional		
		traffic system. All of the residential communities in this area,		
		most housing older adults and seniors, as well as businesses,		
		the college and museum see this project as an important		
		improvement for addressing the many vehicular accidents at		
		the intersections of Rte. 116 and at other adjoining roads.		
		Once completed the project provides bus pull-off areas,		
		traffic calming techniques that allow elderly residents to		
		cross busy streets as well as a link to a long envisioned bike		
		path. This project also effects fuel economy and air quality		
		as there will be no stop signs or lights stopping traffic that		
		currently create slow moving traffic jams at rush hours.		
		Thank you for your consideration with this matter and that I		
		hope I expressed to you and other members of the MPO of		
Robert H. Claflin,		the importance of keeping this project scheduled for funding

	I	I wish to submit the following comment on the Draft 2010 -		
	i i	2013 Transportation Improvement Program (TIP) with		
	1	regard to state project # 604043, Rte 116 Atkins Corner. 1.		
	1	That state project # 604043, Rte 116 Atkins Corner for		
	1	\$2,439,289, be funded under Part 1A: Federal Aid Target		
	1	Projects with Surface Transportation Program (STP) funding		
	i i	instead of being funded under Part 1C: Federal Aid Non-		
	1	Target Projects with Economic Recovery (ER) funds. This		
	1	project is ready to begin in FY 2010 and should not be		
	1	delayed over the discussion of Economic Recovery (ER)		
	1	funds. The Metropolitan Planning Organization (MPO),		
	1	chairman made it quite clear during the July MPO meeting		
	1			
	1	that ER funds are not guaranteed and should not be relied		
	1	upon to fund projects that are ready to proceed. This project		
	1	has the second highest Transportation Evaluation (TEC)		
	1	rating of the projects proposed on the FY2010 TIP. The		
	1	Town will be submitting the 100 % plans this month and will		
	1	complete the principle right-of-way acquisition as well. The		
	1	current schedule for this project has the Town beginning		
	1	water and sewer relocations this fall. The Atkins Corner		
	1	project as it currently stands is a key improvement to the		
	I	current regional traffic system, providing the primary north-		
	I	south access on the eastern side of the Connecticut River. It		
	I	will also provide another link in the long envisioned bike		
	I	route from Mount Holyoke College to the other members of		
	I	the Five College system. This project has also grown into		
	1	the starting point of the long discussed Atkins Corner Plan in		
	1	Amherst. As such the plan has garnered wide acceptance		
	1	and support in the local area and in the Town as a whole.		
	1	Three of the principle businesses in this area have begun		
	I	developing their expansion and improvement plans around		
	1	the completion of this project. To support these plans		
	I	Amherst has entered into a tax incentive agreement with one		
	1	of these employers to provide added incentives to continue		
	I	moving their expansion plans forward. This agreement		
	1	covers about 2 million dollars in improvements and the		8/11/200
Amherst DPW	604043	creation of 10 additional jobs for the south Amherst area.		9
Annielst DI W	00+0+3	On behalf of Hampshire College, I wish to submit the		,
	1	following comment on the Draft 2010 -2013 Transportation		
	I			
	1	Improvement Program (TIP) with regard to state project #		
	l .	604043, Rte 116 Atkins Corner. 1. That state project #		
	1	604043, Rte 116 Atkins Corner for \$2,439,289, be funded		
	l .	under Part 1A: Federal Aid Target Projects with Surface		
	1	Transportation Program (STP) funding instead of being		
	1	funded under Part 1C: Federal Aid Non-Target Projects with		
	1	Economic Recovery (ER) funds. Hampshire College has		
	l .	worked closely for several years with the Town of Amherst		
	1	Planning Department, the Department of Public Works,		
	1	Atkins Farms Country Market, Applewood at Amherst and		
	1	the residents of South Amherst in the planning of the Rte		
Mark K. Spiro Vice	1	116 Atkins Corner road project. It is important that funding		
President for Finance and	1	for the project not be delayed over the discussion of		
Administration	1	Economic Recovery (ER) funds. I urge that the approved	Comment	8/11/200
Hampshire College	604043	funding plan for the Rte 116 Atkins Corner road project	noted	9

		remain in place in order that the project may begin this fall		
		as scheduled. Completion of this project in a timely manner		
		is essential to improving vehicular circulation and the safety		
		of pedestrians and bikers. In addition, the Atkins corner		
		project will provide key improvements to the current		
		regional traffic system, providing the primary north-south		
		access on the eastern side of the Connecticut River. It will		
		also provide another link in the long envisioned bike route		
		from Mount Holyoke College to the other members of the		
		Five College system.		
		Move HPP Design funding (\$360,000) from FY2009 section	Funding	8/12/200

City of Westfield	603783	1C to FY2010 section 1C	moved	9
		The Public Works Committee of the Town of Amherst		
		submits the following comment on the Draft 2010-2013		
		Transportation Improvement Program (TIP), in particular on		
		State Project #604043, Route 116-Atkins Corner. We ask		
		that the Atkins Corner project be funded under Part 1A:		
		Federal Aid Target Projects with Surface Transportation		
		Program (STP) funding, and not under Part 1C: Federal Aid		
		Non-Target Projects with Economic Recovery (ER) funds.		
		The project is ready to begin in 2010 and should not be		
		threatened with terminationor even delayedas a result of		
		the uncertainty that now surrounds ER funds. The Town's		
		Superintendent of Public Works, Guilford Mooring, tells us		
		that ER funds are not guaranteed and may not be used to		
		• •		
		fund projects that are ready to proceed. We therefore ask		
		that the funding be moved from ER funding to STP funding,		
		so that this project, long in planning and now "shovel-ready,		
		can begin. The Atkins Corner Project has already been		
		given the second highest Transportation Evaluation rating,		
		because it will improve traffic flow and enhance pedestrian		
		and bicycle safety in this heavily-traveled, densely		
		populated, and dangerous intersection. IN addition, the		
		reconstruction of the intersection will improve traffic flow		
		and safety for those who get on and off the busses. Further,		
		the Town of Amherst in its master plan has designated		
		Atkins Corner as a center of commercial development, a		
		"village center", and the Atkins Farm corporation plans to		
		enlarge and diversify its operatio9ns there. The Town of		
		Amherst has committed over \$2,000,000 in tax incentives		
		and property transfer to support and this expansion and the		
		development of this village center. It has done so done so		
		because the Atkins Corner project is the cornerstone of the		
		area's economic development. For these reasons, we, the		
		members of the Town's Public Works Committee, ask that		
Town of Amherst Public		Atkins Corner project be given stable STP funding so that		
Works Committee	604043	construction can proceed immediately.		
works Committee	004043	construction can proceed miniediatery.		

		On behalf of the Amherst Select Board, I implore the MPO		
		to change the TIP funding category for the Route 116 -		
		Atkins Corner Reconstruction, State project #604043. The		
		planning for this project has been in the works for many		
		years. It has been through countless rounds of design and		
		approvals. It involves land swap and compensation		
		agreements with more than half a cozen property owners. It		
		has garnered overwhelming support from multiple Town		
		Meeting votes. An intricate web of complex collaboration		
		has finally and painstakingly brought this project to the cusp		
		of construction, and it is now threatened by an unreliable		
		TIP funding classification. Allowing this project to be		
		compromised at this point for this reason would be an		
		accidental indulgence of the public's cynical stereotypes		
		about bureaucracy. Please don't let this happen. This		
		reconstruction is vital for safety and economic development,		
		and will benefit the Five College community and beyond. It		
		is ready to go. Please don't let it be jeopardized by making		
		the final piece of funding uncertain. Please amend the		
		FY2010 TIP to include this under Part 1 A, Federal Aid	Comment	8/13/200
Town of Amherst	604043	Target Projects with STP funding.	noted	9
		I am writing in support of the use of Economic Recovery		
		monies to help fund projects on the Pioneer Valley TIP list,		
		specifically to fund two projects involving the Manhan Rail		
		Trail in Easthampton: The Manhan Rail Trail Bridge over		
		Manhan River (ER \$620,000) - this project was removed		
		from the Easthampton-Northampton Connector project due		
		to constructability issues that could not be resolved before a		
		looming "shovel ready" deadline in June, 2009. Those		
		issues have now been resolved and the bridge project is		
		ready to go. This bridge will complete an important link		
		between the two cities, providing huge economic benefits,		
		opportunities for safe, pollution-free transportation and		
		healthful recreation for persons of all ages and abilities. The		
		Manhan Rail Trail Coleman Road Extension (Sec 115		
		\$653,762; ER \$103,923) - this project has been held up for		
		years due to asbestos in the soil from an old Zonolite plant at		
		the site. This contamination is expected to be removed this		
		fall by the Environmental Protection Agency under a "Time-		
		Critical Removal Action" order. This clean-up paves the		
		way for the construction of this short but vital piece of rail		
		trail. Once completed, this stretch will provide safe off-road		
		access to bicyclists, walkers and others who patronize the		
		many shops and businesses near the Coleman Road trail		
		head. This section is also a critical piece of the network that		
		will ultimately stretch all the way to the Connecticut		
		shoreline. Funding for both these projects has been carefully		
		pieced together using Economic Recovery funds,		
		Transportation Improvement Program funds, Community		
		Preservation Act monies and other funds. But the support of		
Wendy Hammerle		the MPO is essential if these projects are to move forward in		
Member, Manhan Rail		a timely manner. I recognize that you have many requests		
Trail Committee,		and limited funds but I urge you to please support both of	Comment	8/14/200
Easthampton		these important projects. The entire region stands to benefit!	noted	9

		As a board member of the Westfield Business Improvement		
		District and the Executive Director of the Westfield		
		Athenaeum, the public library for the City of Westfield and		
		one of the largest non-profits in the downtown, I was very		
		disappointed to see the Columbia Greenway Project moved		
Christopher J. Lindquist		to Appendix Z in the Draft 2010-2013 Transportation		
board member of the		Improvement Plan. Recently the Draft of the Rethinking		
Westfield Business		Downtown Westfield Plan listed the Columbia Greenway as		
Improvement District and		a key component in the revitalization of the downtown.		
the Executive Director of		Currently the Central Phase of the Greenway is at 75%

		As Chair of the Amherst Public Transportation and Bicycle		
		Committee (PTBC), I urge you to fund the \$2,439,289		
		portion of the Atkins Corner - Route 116 project (State		
		Project #604043) under Part 1A: Federal Aid Target Projects		
		with Surface Transportation Program (STP) funding instead		
		of being funded under Part 1C: Federal Aid Non-Target		
		Projects with Economic Recovery (ER) funds. The PTBC has		
		consistently supported Atkins Corner project because it has		
		wide-ranging benefits to our region: • It will provide		
		significant economic development opportunities for the area.		
		• It will vastly increase traffic safety by improving a very		
		dangerous intersection. • It will provide another section of a		
		multiuse path that will eventually become a North-South		
Fran VanTreese Chair of		alternative transportation route connecting Amherst center		
the Amherst Public		with points south.Furthermore, this project is ready to		
Transportation and		proceed. It should be funded in a manner that lets the work		
Bicycle Committee		begin immediately so that the many benefits of the project	Comment	8/14/200
(PTBC)	604043	can be reaped as soon as possible.	noted	9
		I'd like to add the following to the public comment on the		
		Transportation Improvement Plan, with specific reference to		
		funding Amherst's Atkins Corner Project.		
		Despite the vigorous manner in which Amherst Town		
		officials have advocated for the Atkins Corner Project, I		
		would respectfully suggest that it should not be assigned a		
		high priority for available Federal Stimulus money.		
		Though the intersection of Bay Road, West Bay Road, and		
		Route 116 is in need of updating, the proposal Amherst has		
		put together is a costly, over-planned response to an		
		otherwise fairly straightforward infrastructure issue.		
		The two daisy-chained "roundabouts" the plan incorporates		
		represent a far more expensive and probably less effective		
		solution, to the intersection's redesign than a more		
		conventional, signaled setup. I suspect the roundabouts		
		represent not a highway design best practice, but rather a		
		faddish, "fun" project for the Town's planning and public		
		works staff to design and build much more exciting for		
		them than a boring old traffic light setup.		
		The village loop part of the project primarily benefits		
	1	I me made loop part of the project printarity benefits		1
Hubert F Robert 570		abutting landowners by increasing the value of their land; it	Comment	8/14/200
Hubert E. Robert 570 Bay Road Amherst	604043	abutting landowners by increasing the value of their land; it is also	Comment noted	8/14/200 9

		serves to facilitate luxury-priced Hampshire College's stated		
		aspirations to become a developer of commercial real estate.		
		Neither is, in my opinion, a valid reason to award the project		
		scarce stimulus monies. Amherst unfortunately has a		
		history of putting together over-planned, overpriced pubic		
		works projects. The downtown parking garage, with it's		
		twice-the-necessary price tag, is one recent example.		
		The Pioneer Valley has many other far more pressing traffic		
		improvement needs than Atkins Corner. I would strongly		
		urge the PVPC not recommend it for funding.		
		Easthampton Manhan Rail Trail Coleman Rd Extension:		
		Given the likely timeline for EPA clean-up of the asbestos-		
		contaminated soil in the project area, the project should be		
		considered for funding as non-ARRA only. Without the		
		EPA cleanup cost charged to the project, the project is		
		anticipated to be fully funded with the Section 115 and HPP-	Comment	8/17/200
MHD	604441	596 funds, which should remain in Section 1C for 2010.	noted	9
		FFY 2013 Belchertown Route 181 (Correct Project Number	Project	8/17/200

		I wish to Submit the following comment on the above draft		
		with regard to state project #604043. 1. That state project		
		#604043, Rte 116 Atkins Corner for \$2,429,289., be funded		
		under Part 1A: Federal Aid Target Projects with Surface		
		Transportation Program (STP) funding instead of being		
		funded under Part 1C: Federal Aid Non=Target Projects		
		with Economic Recovery (ER) funds. This project is ready		
		to begin in FY 2010 and should not be delayed over the		
		discussion of Economic Recovery (ER) funds. However, the		
		Metropolitan Planning Organization (MPO) chairman made		
		it quite clear during the July MPO meeting that ER funds are		
		not guaranteed and should not be relied upon to fund		
		projects that are ready to proceed. As one of the principal		
		businesses at this location, we have invested a great deal of		
		time and expense on plans, both architectural and landscape		
		plans, to incorporate the future changes to our property due		
		to the improved intersection. We have been involved in and		
		cooperative in land taking and land swap. This project		
		should not be delayed because the intersection, which has		
		high traffic county, is a safety hazard. There have been		
		numerous automobile accidents at this intersection. Also,		
Pauline Lannon,		we put out lives at risk every time we try to cross the street.

COMMENT RECEIVED DURING PUBLIC REVIEW OF PROPOSED CHANGES (12/21/2009 - 1/5/2010)

Comment By:	Projis	Comment	Action	Date
MassCentral Railroad Corporation	FRE-101	As the year comes to a close and the final stimulus funds are being dispersed, I am again asking that you support the rehabilitation of the Ware River Secondary and the Massachusetts Central Railroad operates this rail line from Palmer to Barre, under Agreement with the MassDOT. The Commonwealth of Massachusetts owns the track known as the Ware River Secondary and the Massachusetts Central Railroad operates this rail line from Palmer to Barre, under Agreement with the MassDOT. The rebuilding of the Ware River Secondary rail INFRAUSTRUCTURE has been on the STIMULUS LIST of "shovel ready projects" for many months. This Rail Project has had the ongoing support of MassDOT/Rail. The Pioneer Valley Planning Commission (MPO), The Central Massachusetts Regional Planning Commission (MPO), Congressman John Olver, Congressman Richard Neal, Senator Steven Brewer, Representative Anne Gobi, and ALL the Towns and Businesses that we serve. Reliable and continued rail service is essential to our rail customers. Our customers directly employ over 1,000 Massachusetts workers and their products and services provide employment for many times that number. According to studies by the Association of American Railroadsevery \$1.00 invested in improving rail infrastructure generates \$3.00 in economic growth activity. Every \$1 billion of investment in improving rail infrastructure creates 20,000 jobs. As we look ahead to our transportation issues for 2010 and beyond, it is apparent that expanding the role of rail passenger and rail freight is essential for our economy, our environment and our healthy lives. I am therefore again asking for your support of the \$4 million Stimulus Fund for this project. With the new ownership of the Mass Central Railroad our business has grown. Along with our growth, the Economic Growth of Central Massachusetts has followed. Without a major rebuilding of your own track, this growth can not continue Cummington Route 9 Resurfacing project (FFY 2011)	Comment s noted	12/28/200 9

Development		Transportation Improvement Plan (TIP). In reviewing the	3 110100	5
		proposed project list, I find that the improvements to the		
Department				
		Ware River Secondary Track have not been included for		
		funding. Nevertheless, I believe that the MPO may have		
		an opportunity to keep the door open for funding this		
		important project. While I understand that the MPO has		
		a responsibility to endorse a TIP that is fiscally		
		constrained, the funding stream that is provided through		
		the American Recovery and Reinvestment Act presents		
		a unique opportunity to secure the necessary funds for		
		the Ware River rail improvements. It seems quite		
		possible that approved projects from other jurisdictions		
		may fall by the wayside. This could lead to a reallocation		
		of funds from other states, or other regions within the		
		Commonwealth, that will advance a truly "shovel-ready"		
		project such as this one. I suggest that the Ware River		
		Secondary Track project be added to the FY2010 TIP list		
		as a place-holder, with the source of funds "to be		
		determined". Should ARRA funds become available, the		
		project could then be put out for bid without the need for		
		the MPO or the Commonwealth to return to the TIP		
		amendment process. Allow me to close by saying that I		
		appreciate your past support for improvements to the		
		Ware River Secondary Track and remain confident that		
		you will act in the best interests of the region as a whole		
Town of Ware	FRE-101	At their meeting on December 29, 2009 the Ware Board	Comment	12/30/200
		of Selectmen voted their support for the inclusion of the	s noted	9
		Ware River Secondary Track improvement project in the		
		FY2010 Transportation Improvement Plan. The Board		
		views the project as essential to the future economic well		
		being of the region because several major employers		
		depend on the Ware River line for efficient transportation		
		of raw materials and finished products. Without this		
		important transportation link, these key industries might		
		not survive. Several businesses have made significant		
		investment in recent years in plant expansion and		
		processing capacity. These include Kanzaki Specialty		
		Papers, A&R Transportation and ABC&D Recycling in		
		Ware, and Wildwood Reload in South Barre. Their		
		private investment has been complemented by safety		
		enhancements at several grade crossings and the		
		planned replacement of the rail bridge over Route 9		
		(East Street) in Ware. Unfortunately, while these		
		improvements have gone on, deterioration of track and		
		ties has led to weight and speed restrictions along this		
		active rail corridor. The proposed \$4million investment		
		will bring the track to a solid Class 2 performance		
		standard. It will immediately provide new jobs in		
		construction trades, and secure long term employment		
		opportunities at the industries along the line. We ask		
		that you give careful consideration to the inclusion of this		
		project in the current Transportation Improvement Plan.		

State Senator	FRE-101	I am pleased to be writing on behalf' of the Town of Ware	Comment	1/5/2010
Stephen M. Brewer		(Contact: Paul E. Hills, Director Town of Ware	Noted	
		Community Development Department. 126 Main Street,		
		Ware. MA 01082; Telephone: 413-967-9648. ext. 120), relative to its request for funding to improve the Ware		
		River Valley Secondary Track.		
		It is my, understanding that the Town of Ware is seeking		
		\$4 million to make improvements to the railroad corridor		
		that runs from Palmer to South Barre. It is my further		
		understanding that this project was previously advanced		
		by the Massachusetts Department of Transportation as a		
		Transportation Improvement Plan where the finding was		
		to come from the American Recovery and Reinvestment		
		Act (ARRA). It is also my understanding that Governor		
		Deval Patrick was responsible for the project selection and the Ware River Valley Secondary Track did not		
		make his priority list. It is my additional understanding		
		that the project has received an unprecedented level of		
		support from the region with residents, businesses, and		
		local officials. I am also in strong support of the Town of		
		Ware's request and I would appreciate your		
		consideration of this important matter. It would also be		
		appreciated if you would provide me with a copy of any		
		correspondence that you may have with the Town of		
		Ware in this regard. Thank you for your time and attention to this matter.		
PALMER		The Town of Palmer currently has a unique and	Comment	1/5/2010
REDEVELOPMEN		exciting opportunity for creating jobs and producing	Noted	
T AUTHORITY		revenue for Western Massachusetts. Reinstating		
		passenger railroad service to Union Passenger Station		
		has the ability to spark the economic growth needed in		
		these economically challenged times. Our plan also		
		includes the construction of a parking facility to		
		accommodate short & long term parking, as well as a recreational facility to act as a town common for hosting		
		events and festivals. These two projects, along with		
		restoring passenger service back to Palmer combine to		
		make a tremendous revenue generator for the Town of		
		Palmer. With much of the infrastructure already in place,		
		our project can utilize the funding provided to us in the		
		most proficient way, ensuring our projects overall		
		success and quick completion. Platform construction with		
		walkway and Subway Entrance construction is estimated at \$500,000.00 Maximum for completion. Parking Lot &		
		Lighting estimate of \$800,000.00. Recreational Theme-		
		Park & Relocation of the Highway Department estimates		
		at \$3.5 Million including building & rebuilding. The		
		Palmer Redevelopment Authority would ask to seek		
		funds for all funding or individually funding; Total project		
		cost would be \$4.8 Million.		
		We are proud to say that we are not alone in our		
		efforts, and have an ever-growing list of letters of support		
		from local communities and organizations, state and		
		regional officials, railroad industry representatives and		
		even our community residence praising and supporting		

our efforts. Our current list of supporters include:	
- MA State Representative Todd Smola MA State Senator Stephen Brewer	
- MA Lt. Governor Timothy Murray	
- Town of Palmer - Town of Amherst	
- Town of Ware	
- Town of Erving, CT	
- Town of Brimfield	
- Town of Stafford, CT - Town of Sturbridge	
- Town of Southbridge	
- Town of Warren	
- Town of Webster	
- Town of Wales - Old Sturbridge Village	
- Old Sturbridge Village - State of Vermont Rail Service (The Vermonter)	
- Crimmins & Graveline Insurance Agency - Marc	
Graveline	
- Quaboag Hills Chamber of Commerce - Leonard Weake,	
- Palmer Economic Development Advisory Committee - Paul Burns	
- Rail America Operations - Charles Hunter (Director of	
Operations - East)	
and the list continues to grow every week.	
Some of the competitive advantages to reinstating	
passenger rail service include: •Extensive Road Network to funnel rail passengers-	
leading to the Regional HUB of Palmer	
High Population Count	
•Existing rail provides additional rail links to other parts of	
CT drawing from the Central MA region, which supplements the current link from Springfield which is	
only realistically feasible by boarding in Palmer	
•Existing rail infrastructure can be utilized without	
constructing new rail - thus allowing this to occur in	
minimal amount of time •Minimal Required Improvements for new passenger	
platform as opposed to new or full track upgrades and	
new rail stations	
•Time of Implementation – short - favorable with funding	
and support by all stakeholders with A.R.R.A. Funding	
 Costs – very favorable on return Future Developments/Expansion – Special Events 	
•Growing Customer Base/MarketWe have a presentation	
detailing all of our short & long term goals for success,	
plans for development, and projected start up cost and	
revenue figures that was presented to the	
Massachusetts Department of Transportation, and can be made available for your review at anytime. We ask	
that you please take advantage of this great opportunity	
and help us give back to the State of Massachusetts. By	
allowing MBTA Service from Amherst to Palmer via	

		Worcester/Boston, our plan is also favorable to regional economic growth. The Lakeshore Limited is also on our door step as we speak, and our region wants to access this now.		
Philip Opielowski, Palmer, MA Chairman, Palmer Public Library Railroad Advisory Board Member, Palmer Rail Coalition	FRE-101	It has been brought to my attention that ARRA stimulus dollars may be available to perform critical upgrades to the track of the "Ware River Secondary", the 25-mile line that is owned by the Commonwealth and leased to the Mass Central Railroad between Palmer and Barre. This communication is in reference to the Regional Transportation Improvement Plan (TIP). The availability of any portion or all of approximately \$4 million available dollars are a very small sum to invest to realize greater economic returns to the region encompassing Ware, Hardwick, and Barre. I currently understand that this line is operable with an industry standard 286,000# loading factor, however I believe this standard exists only between Palmer and as far as the town of Ware for about 12 miles of its 25-mile total. It would be in the best interests of communities north of Ware to include Hardwick and Barre to have a rehabilitated track refurbished to the higher 286K standard. In this way, there exists a greater potential to locate new industries that transport goods using freight cars built to accommodate heavier lading. Thus, this higher standard track may very well entice new industry and stimulate new employment. I strongly propose an aggressive pursuit of these funds to perform this upgrade.	Comment noted	1/5/2010
ΡΥΤΑ	Transit TIP	We plan to spend these amounts in the following Federal Fiscal Years: FFY09 FFY10 FFY11 TOTAL JARC \$112,374 \$337,123 \$0 \$449,497 NF \$6,688 \$80,780 \$79,260 \$166,728	Changes made	1/5/2010

		Hardwick, and Barre. I strongly propose an aggressive pursuit of these funds to perform this upgrade. If you have any questions please feel free to call me.		

In addition to the above changes, the Pioneer Valley Transit Authority requested that the following be included: The Pioneer Valley Transit Authority, the FTA Section 5307(c) applicant, has consulted with the Pioneer Valley Planning Commission and concurs that the TIP satisfies the public hearing requirements that pertain to the development of the Program of Projects for regular Section 5307, Urbanized Area Formula Program, grant application including the provision for public notice and the time established for public review and comment.

For FTA projects that are not routine; i.e. Section 5307 applications that required environmental assessment or an environmental impact statement, the public involvement provided herein for TIP review is not sufficient. Additional public involvement will be required by FTA prior to grant approval, as presented in the joint FHWA/FTR environmental regulations, 23 CFR-Part 771.

The Federal Aid (FA) and Non-Federal Aid (NFA) elements were separated into two components. The FA component of the TIP was endorsed by the MPO and the NFA component is included in the main body of the TIP, however, is not subject to federal planning rules.

III. FEDERAL COMPONENT

PIONEER VALLEY MPO ENDORSEMENT

PIONEER VALLEY MPO ENDORSEMENT SHEET The signatures below signify that all members of the Pioneer Valley Region's Metropolitan Planning Organization, or their designees, have met on January 6, 2010 and discussed the following item for endorsement: Amendments to The Pioneer Valley Region's Federal Fiscal Years 2010 - 2013 Transportation Improvement Program (TIP). CERTIFICATION OF THE 3-C PLANNING PROCESS

In accordance with the Metropolitan Planning Final Rule, the Pioneer Valley MPO has completed its review and hereby certifies that the conduct of the 3-C Transportation Planning Process complies with the requirements of CFR 450.334 and includes activities to support the development and implementation of this TIP, the Regional Transportation Plan, and subsequent project development activities, as necessary and to the degree appropriate.

To reinforce this self certification, the Federal Highway Administration (FHWA) and the Federal Transit Administration (FTA) conducted a certification review of the Pioneer Valley MPO planning process in December 2004. The two day on-site review was preceded by a desk audit of the major planning documents completed as part of the planning process. Based on the certification review, the transportation planning process for the Pioneer Valley region was found to substantially meet the requirements of 23 CFR 450 Subpart C and 49 CFR 613.

CERTIFICATION OF THE 3C PLANNING PROCESS

Concurrent with the submittal of the proposed TIP to the FHWA and the FTA, the MPO shall certify that the metropolitan transportation planning process is being carried out in accordance with all applicable requirements including:

1. 23 U.S.C. 134, 49 U.S.C. 5303, and this subpart;

 In non-attainment and maintenance areas, sections 174 and 176 (c) and (d) of the Clean Air Act, as amended (42 U.S.C. 7504, 7506 (c) and (d)) and 40 CFR part 93;

 Title VI of the Civil Rights Act of 1964, as amended (42 U.S.C. 2000d-1) and 49 CFR part 21;

 49 U.S.C. 5332, prohibiting discrimination on the basis of race, color, creed, national origin, sex, or age in employment or business opportunity;

 Section 1101(b) of the SAFETEA-LU (Pub. L. 109-59) and 49 CFR part 26 regarding the involvement of disadvantaged business enterprises in USDOT funded projects;

 The provisions of the Americans with Disabilities Act of 1990 (42 U.S.C. 12101 et seq.) and 49 CFR parts 27, 37, and 38;

7. The Older Americans Act, as amended (42 U.S.C. 6101), prohibiting discrimination on the basis of age in programs or activities receiving Federal financial assistance;

 Section 324 of title 23 U.S.C. regarding the prohibition of discrimination based on gender; and

 Section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) and 49 CFR part 27 regarding discrimination against individuals with disabilities.

10. Anti-lobbying restrictions found in 49 USC Part 20. No appropriated funds may be expended by a recipient to influence or attempt to influence an officer or employee of any agency, a Member of Congress, in connection with the awarding of any Federal contract.

FUNDING INFORMATION

Federal Aid Funding Targets

The EOT provided the revised PVPC federal aid highway funding targets and CMAQ targets for the region on July 1, 2009 The targets are provided for FFYs 2010 through 2013 and represent both the federal aid portion and respective state match.

Federal financial resources for transit are projected using appropriated amounts provided by the FTA for the funding categories of Sections 5307 and 5311. Sections 5309 and 20 are based on estimates of what will be reasonably available. Due to the discretionary nature of these categories, project line items are maintained in the fourth year of the TIP until an actual grant award is tendered. Section 5310 is programmed through the state and is awarded on a discretionary basis. Projections are based on past experience and the funding level provided by the State.

Federal Aid Financial Constraint

The federal aid element of the TIP is financially constrained according to the definition in Federal Register 23 CFR Part 450.324. The federal aid projects programmed for this region reasonably meet the federal aid funding targets provided for the region. Only projects for which funds can reasonabley be expected have been included. Table 3 shows both these target amounts and the amounts programmed for highway projects during fiscal years 2010-2013. Projects that are not charged against the funding targets are not presented in the table. These projects include: Statewide items; and special funding projects.

		Federal	Highway F	inancial Pla	an	
Fiscal Year	Federal Target	Federal Aid Programed	CMAQ Target	CMAQ Funded	HSIP Target	HSIP Funded
2010	\$13,160,66 3	\$13,093,718	\$0	\$0	\$1,080,992	\$1,080,992
2011	\$12,088,33 5	\$12,088,335	\$0	\$0	\$1,080,992	\$1,080,992
2012	\$11,716,84 1	\$10,988,901	\$0	\$0	\$1,080,992	\$1,080,992
2013	\$9,396,840	\$8,629,811	\$2,161,984	\$2,161,984	\$1,080,992	\$1,080,992

Table 3

The funding targets were programmed to projects according to project priority rating. Projects were programmed slightly beyond the program target with the understanding that the targets are not earmarks and program levels are expected to fluctuate.

The TIP reflects an emphasis on the maintenance and operation of the current transportation system with the ability to provide capital improvements. The federal aid program for each year consist of almost entirely of maintenance projects for the present transportation system.

The transit program outlined in Table 4 represents both apportioned items as well as discretionary items. The total programmed amount represents both the federal, state and local contributions.

Fed	eral Transit Financial Plan
Fiscal Year	Total Programmed
2010	\$108,779,125
2011	\$78,474,264
2012	\$80,135,714
2013	\$82,257,684

	Federal Transit Financial Plan
l Year	Total Programmed
10	\$108,779,125

Table 4

The transit projects programmed focus on maintaining and operating the present system and reflect little to no expansion. The present transit system is being evaluated in order to service the same area more efficiently.

IV. TRANSPORTATION PROJECT PRIORITIES

ORGANIZATION OF PROJECT LISTINGS

Each project in the TIP contains the following information:

<u>SID</u> - Project identification numbers given by the Massachusetts Highway Department.

City/Town - Town or city in which a project is located.

Project Description - A brief description of work to be funded under the project.

Funding - The funding catagory from which funding is expected.

Federal Funds - The amount of federal dollars allocated for project construction.

<u>State Funds</u> - The amount of state dollars allocated to the project.

Total Cost - The total dollar amount that the project is expected to cost.

Regional Target - The total combined Federal and State dollar amount provide for project funding

<u>TEC Score</u> – Transportation Evaluation Criteria (TEC) is used by the TIP sub-committee to rank each potential TIP porject

V. FEDERAL AID REGIONAL PROJECT LISTINGS

PROJECT IMPLEMENTATION

The TIP is also used as a management tool for monitoring the progress and implementation of the RTP and previous TIP's. The award status of FFY 2007-2009 TIP projects are identified in the following table.

20	
Table	

Project Description	City/Town	Project ID	TIP Year	Project Status
Great River Bridge	Westfield	600933	2006	Under Construction
Bridge Replacement, S-18-007 Rt 47 over Bachelor Brook	South Hadley	603260	2007	Under Construction
Bridge deck resurfacing Brush hill Road over I-91	West Springfield	604503	2007	Under Construction
Lower Hampden Road	Monson	601502	2007	Under Construction
Route 202 Resurfacing	Belchertown/Pelham	602419	2007	Under Construction
Intersection & signal improvements Roosevelt Ave/Page Blvd	Springfield	604822	2007	Under Construction
Northampton - Hospital Hill/Earl Street	Northampton	604451	2007	Under Construction
Downtown Rail Trail connector	Northampton	602887	2007	Under Construction
Bridge Replacement C-11-024 Kinney Brook Rd over Middle Branch	Chester	602080	2007	Under Construction
Bridge rehab. Smith Rd over Main Branch (Westfield River)	Chester	600737	2007	Under Construction
Northampton - Hospital Hill/Earl Street	Northampton	604451	2007	Under Construction
Design and construction of Southwick Rail Trail Phase I	Southwick/Westfield	604443	2007	Under Construction
Route 20 resurfacing and related work	Brimfield	604992	2007	Under Construction
Intersection improvements Roosevelt Ave/Page Blvd. MIP II	Springfield	604822	2007	Under Construction
State Street corridor improvements	Springfield	604447	2007	Under Construction
I-91 Intelligent Transportation System (ITS)	Region (I-91)	603903	2008	Under Construction
Front Street Reconstruction	Chicopee	602111	2008	Under Construction
Northampton bike path (Look park extension)	Northampton	602885	2008	Under Construction
Bridge replacement Lyman St. over Second level canal	Holyoke	602536	2008	Under Construction
Longhill Street & Route 5 over I-91 -bridge preservation	Springfield	602570	2008	Under Construction
Route 5 (South End Bridge) over the railroad and river	Agawam/West Spfld.	604982	2008	Under Construction
Construct Holyoke Canalwalk and streetscape improve (Phase IA)	Holyoke	603262	2008	Under Construction
Route 10/202 resurfacing	Westfield	605134	2008	Under Construction
Maple Street over Westfield River - bridge preservation	Chester	602349	2008	Under Construction
Bridge replacement Old State highway over West Branch (Westfield River)	Chester	604021	2008	Under Construction
*Center Street (Route 116)	Chicopee	603996	2009	Awarded 3/31/09
Springfield Street Reconstruction	Palmer	602575	2009	Awarded 4/22/09
Route 20 Resurfacing	Chester/Huntington	602314	2009	Awarded 3/18/09
Rte. 9 & Bridge Rd. Roundabout	Northampton	603054	2009	Not Advertised
	East Longmeadow	602338	2009	Awarded 5/19/09
Route 10 & 5/10 Resurfacing and related work (ER)	Easthampton, Greenfie	605541	2009	Awarded 5/12/09
***Jackson St. School (Safe Routes to School Infrastructure Program) (ER)	Northampton	605634	2009	Not Advertised
Route 9 Resurfacing and Related work on 2 sections of roadway (ER)	Belchertown, Ware	605540	2009	Awarded 5/12/09
	Palmer	FRE-101	2009	Not Advertised
Connecticut River Line improvements (IR)	Springfield to Northfield	FRE-105	2009	Application Process
Elm Street Reclamation and Related Work (ER)	Hatfield	604208	2009	Awarded 6/30/09
Red Bridge Road Bridge Reconstruction (Over NE Utilities Canal) (ER)	Wilbraham	602652	2009	Letting 7/14/09
Manhan Rail Trail Earle Street to Ferry Street (ER)	Northampton/Eastham	604207	2009	Letting 8/11/09
I-91 Pavement rehabilitation	Chicopee/Springfield	604604	2009	Not Advertised
(ER) Economic Recovery (IR) Intercity Passenger Rail				

CONFORMITY DETERMINATION

In accordance with Section 176 (c)(4) of the Clean Air Act as amended in 1990, the Pioneer Valley MPO has completed its review and hereby certifies that the FFY 2010-2013 Transportation Improvement Program has been developed from a conforming Transportation Plan and therefore conforms with 40 CFR parts 51 and 93 issued on November 23, 1993 and 310 CMR 60.03, issued on December 30, 1994.

The CAAA defines conformity to a SIP to mean conformity to the plan's purpose of eliminating or reducing the severity and number of violations of the NAAQS and achieving expeditious attainment of the standards. The Pioneer Valley MPO has certified that all activities outlined in the 2006 Regional Transportation Plan:

- Will not cause or contribute to any new violation of any standard in any area.
- Will not increase the frequency or severity of any existing violation of any standard in any area.
- Will not delay the timely attainment of any standard of any required interim emission reductions or other milestone in any area.

The analysis that was performed on the Pioneer Valley RTP includes all regionally significant transportation projects proposed to be completed within the timeframe of the RTP. All regionally significant projects included in the 2010-2013 TIP have been included in the analysis of the Pioneer Valley RTP; therefore, the TIP has been developed from the currently conforming RTP. The projects in the TIP are of the same design and concept that were analyzed in the RTP. Therefore, no new analysis was required for the TIP. All regionally significant RTP projects for 2010 through 2013 are programmed in the TIP (in other words, non-exempt RTP projects in the 2006 action scenario must be included in the TIP). Because projects in the TIP come from the conforming RTP, the same air quality analysis utilized for the RTP can be used for the TIP.

In addition, conformity to the SIP requires the RTP to be "financially constrained by year and include a financial plan that demonstrates which projects can be implemented using current revenue sources and which projects are to be implemented using proposed revenue sources (while the existing transportation system is being adequately operated and maintained)". The overall RTP is financially constrained to the annual federal apportionment and projections of state resources reasonably expected to be available during the appropriate time frame.

Included in this chapter are the tables taken from the conforming Addendum to the 2006 Regional Transportation Plan for the Pioneer Valley Region. Table 21 shows the non-exempt projects of the FFY 2010-2013 TIP. Table 1 in Appendix B shows the Volatile Organic Compound and Table 2 shows the Nitrogen Oxide emissions calculated for the Western Massachusetts Ozone Nonattainment Area. As shown in this table, the Pioneer Valley MPO in combination with the other MPOs/RPAs in the Western Nonattainment Area conforms to the requirements set forth in the Massachusetts SIP. Emissions calculated for the Springfield Carbon Monoxide Nonattainment Area are also included. Therefore, this TIP, in combination with the TIPs from the other MPOs in the Western Massachusetts Nonattainment Area, is found to be in compliance.

Municipality	Project Description
Agawam/Springfield	South end bridge I-91 Improvements
Chicopee	Deady Memorial Bridge
Hadley	Widening of Route 9
Holyoke	Intermodal Center
Northampton	Damon Road Improvements
Springfield	Ramp Reversal
Westfield	Great River Bridge
Westfield	Intermodal Center

Table 21FFY 2010-2013 Non-Exempt Projects

Timely Implementation of Transportation Control Measures

Transportation control measures (TCMs) have been required in the SIP in revisions submitted to EPA in 1979, 1982 and those submitted as mitigation for the construction of the Central Artery project. Those SIP TCMs included in the 1979 and 1982 submission for implementation in the Pioneer Valley Region have all been accomplished through construction or through implementation of ongoing programs. These projects have all been included past Pioneer Valley MPO Transportation Plans and TIPs.

DEP submitted to EPA their strategy of programs to show Reasonable Further Progress of a 15% reduction of VOCs in 1996 and the further 9% reduction of NOx toward attainment of the National Ambient Air Quality Standards (NAAQS) for ozone in 1999 and beyond. Within that strategy, there are no specific TCM projects. Traffic flow improvements to reduce congestion and, therefore, improve air quality are encouraged. Other transportation-related projects that have been included in the SIP control strategy are listed below:

- Enhanced Inspection and Maintenance Program
- California Low Emission Vehicle Program
- Reformulated Gasoline for On and Off-Road Vehicles
- Stage II Vapor Recovery at Gasoline Refueling Stations
- Tier I Federal Vehicle Standards

APPENDICES

2013

APPENDIX B: Air Quality Conformity Status

Air Quality Conformity Determination

Pioneer Valley (MPO)

FFY 2010-2013 Transportation Improvement Program

Background

The Commonwealth of Massachusetts is classified as serious nonattainment for ozone, and is divided into two nonattainment areas. The Eastern Massachusetts ozone nonattainment area includes Barnstable, Bristol, Dukes, Essex, Middlesex, Nantucket, Norfolk, Suffolk, and Worcester counties. Berkshire, Franklin, Hampden, and Hampshire counties comprise the Western Massachusetts ozone nonattainment area. With these classifications, the 1990 Clean Air Act Amendments (CAAA) required the Commonwealth to reduce its emissions of volatile organic compounds (VOCs) and nitrogen oxides (NOx), the two major precursors to ozone formation to achieve attainment of the ozone standard. In April 2002, the City of Springfield was re-designated to attainment for carbon monoxide with an EPA-approved limited maintenance plan (see the 2007 Transportation Plan for more details).

The CAAA also required Metropolitan Planning Organizations (MPOs) within nonattainment areas to perform conformity determinations prior to the approval of their Regional Transportation Plans (RTPs) and Transportation Improvement Programs (TIPs). The most recent prior conformity determination occurred in the summer of 2007, when the Federal Highway Administration (FHWA) – in consultation with the Environmental Protection Agency (EPA New England) and the Massachusetts Department of Environmental Protection (DEP) – confirmed that all 13 of the RTPs for the year 2007 in Massachusetts were in conformity with the Massachusetts State Implementation Plan (SIP). A brief summary of major conformity milestones in recent years is as follows (more details are provided in the 2007 RTPs and related documents):

Between 2003 and 2006, several new conformity determinations were made that were triggered by various events, including: The 2003 regional transportation plans, a change in designation from the one-hour ozone standard to an eight-hour ozone standard, and various changes to regional TIPs that involved reprogramming transportation projects across analysis years.

In 2007, air quality analyses were conducted on behalf of all the 2007 Regional Transportation Plans (RTPs), the purposes of which were to evaluate the RTPs' air quality impacts on the SIP. Conformity determinations were performed to ensure that all regionally significant projects were included in the RTPs. The Massachusetts Executive Office of Transportation found the emission levels from the 2007 Regional Transportation Plans to be in conformance with the SIP. Each MPO had certified (and continues to certify) that all activities outlined in its Plan and its TIP:

- will not cause or contribute to any new violation of any standard in any area;
- will not increase the frequency or severity of any existing violation of any standard in any area; and,

• will not delay the timely attainment of any standard or any required interim emission reductions or other milestones in any area.

On April 2, 2008, EPA found that the 2008 and 2009 motor vehicle emissions budgets in the January 31, 2008 Massachusetts 8-hour ozone State Implementation Plan revision were adequate for transportation conformity purposes. The submittal included 2008 and 2009 motor vehicle emission budgets for the Boston-Lawrence-Worcester (Eastern Massachusetts) and Springfield (Western Massachusetts) 8-hour ozone nonattainment areas. Massachusetts submitted these budgets as part of the 8-hour ozone attainment demonstration and reasonable further progress plan for both nonattainment areas, and as a result of EPA's adequacy finding, these budgets are required to be used for this and future conformity determinations.

Conformity Test

The conformity test is to show consistency with the emissions budgets set forth in the SIP, and to contribute to reductions in CO nonattainment areas. In addition, the format of the conformity test is determined by evolving regulations. These regulations set specific requirements for different time periods depending on the timeframe of the Commonwealth's SIP submittals to EPA. These periods are defined as follows:

Control Strategy Period: Once a control strategy SIP has been submitted to EPA, EPA has to make a positive adequacy determination of the mobile source emission budget before such budget can be used for conformity purposes. The conformity test in this period is consistency with the mobile source emission budget.

Maintenance Period is the period of time beginning when the Commonwealth submits and EPA approves a request for redesignation to an attainment area, and lasting for 20 years. The conformity test in this period is consistency with the mobile source emission budget.

Horizon years for regional and state model analyses have been established following 40 CFR 93.106(a) of the Federal Conformity Regulations. The years for which the regional and state transportation models were run for emission estimates are shown below:

- 2000: Milestone Year This year is currently being used by the statewide travel demand model as the new base year for calculation of emission reductions of VOCs and NOx.
- 2010: Analysis Year first year of TIP
- 2020: Analysis Year
- 2030: Horizon Year last forecast year of regional transportation plans

Changes in Project Design since the Last Conformity Determination Analysis

The milestone and analysis year transportation model networks are composed of projects proposed in the approved TIPs and 2007 RTP. Projects in these networks consist of all in-place "regionally significant" projects plus all such projects where at least one of the following steps has occurred within the past three years:

- Comes from the first year of a previously conforming TIP,
- Completed the NEPA process, or
- Currently under construction or are undergoing right-of-way acquisition

A complete listing of future regionally significant projects for the Pioneer Valley MPO can be found (reference RTP), and is provided below:

Analysis Year	Community	Project Description
2009	Chester	Maple Street bridge restoration as a one-way bridge.
2009	Westfield	Route 10/202 Great River Bridge - two bridges acting as one-way pairs.
2020	Holyoke	Improvements to Commercial Street corridor.
2020	Chicopee	Memorial Drive signal coordination.
2020	Hadley	Route 9 signal coordination.
2020	Westfield	Route 20 signal coordination.
2020	Holyoke, W.Springfield	Route 5 signal coordination.
2020	Chicopee	Traffic coordination and improvements along Broadway.
2020	Springfield	New slip ramp from I-291 to East Columbus Avenue.
2020	Northampton	Road widening on Damon Road from Rte 9 to King St.
2020	E. Longmeadow	Improvements to the East Longmeadow Rotary.
2020	Northampton	Improvements to I-91 Exit 19 to construct a full interchange.
2020	West Springfield	Improve the Union Street Railroad Underpass. Construct a truck bypass road.
2020	Agawam	Route 57 Fly-over Ramp.
2030	Agawam, Longmeadow, Springfield	Improve the South End Bridge, pedestrian connections to Agawam/Springfield Riverwalks, fix existing lane reduction problem on I-91 between Exits 1-3.
2030	Agawam	Improvement to Route 5 access ramps for truck routing.
2020	Agawam	Route 57 Phase II new limited access highway from Route 187 to Southwick Line.
2030	Chicopee, Holyoke	Route 116 Bridge Improvements (possible widening).
2030	Ludlow, Springfield	Route 21 bridge reconstruction (possible to be widened as well).

Analysis	Community	Project Description – Pioneer Valley Region
Year	-	
2010	Hadley	Route 9 widening to four lanes - from Calvin Coolidge Bridge to West Street.
2010	Chicopee	Deady Memorial Bridge – widen to 5 lanes.
2010	Holyoke	Improvements to Commercial Street corridor.
2010	Chicopee	Memorial Drive signal coordination.
2010	Hadley	Route 9 signal coordination.
2010	Westfield	Route 20 signal coordination.
2010	Holyoke, W.Springfield	Route 5 signal coordination.
2010	Chicopee	Traffic coordination and improvements along Broadway.
2010	Westfield	Route 10/202 Great River Bridge - two bridges acting as one-way pairs.
2010	Springfield	New slip ramp from I-291 to East Columbus Avenue.
2010	Northampton	Road widening on Damon Road from Rte 9 to King St.
2010	Chester	Maple Street bridge restoration as a one-way bridge.
2020	E. Longmeadow	Improvements to the East Longmeadow Rotary.
2020	Northampton	Improvements to I-91 Exit 19 to construct a full interchange.
2020	West Springfield	Improve the Union Street Railroad Underpass. Construct a truck bypass road.
2020	Agawam	Route 57 Fly-over Ramp.
2030	Agawam, Longmeadow,	Improve the South End Bridge, pedestrian connections to Agawam/Springfield
	Springfield	Riverwalks, fix existing lane reduction problem on I-91 between Exits 1-3.
2030	Agawam	Improvement to Route 5 access ramps for truck routing.
2020	Agawam	Route 57 Phase II new limited access highway from Route 187 to Southwick Line.
2030	Chicopee, Holyoke	Route 116 Bridge Improvements (possible widening).
2030	Ludlow, Springfield	Route 21 bridge reconstruction (possible to be widened as well).
Analysis	Community	Project Description – Berkshire Region
Year	·	
2020	Pittsfield	Safety and capacity improvements on East St. between Elm St. and Merrill Road
2020	Great Barrington	Main St .intersection improvements, signalization upgrades and add turning lanes
2020	Lanesboro/Cheshire	Construct passing lanes on Route 8 between Mall Road and truck weighing station
2020	Stockbridge - MassPike	Construct full interchange at Exit 1 with mitigation on impacted area roadways
2020	Pittsfield	Intersection widening, turning lane improvements First/Tyler & Tyler/Stoddard Ave
2020	Pittsfield	Construct connector street from W. Housatonic St. to West St. near CSX yard
2030	Great Barrington	Realign & widen State Rd., including new bridge to replace the current Brown bridge

Regionally Significant Projects Included in the Regional Transportation Models for the Western Massachusetts Ozone Non-Attainment Area

The Commonwealth requires that any changes in project design from the previous conformity determination for the region be identified. The last conformity determination was performed on the 2007 Regional Transportation Plan.

Air Quality Conformity Analysis

Specific information regarding the analysis and modeling methods, latest planning assumptions, and consultation procedures are all detailed in the 2007 RTP (and appendices). The emissions from the following MPOs have been combined to show conformity with the SIP for the Western Massachusetts Nonattainment Area:

- Berkshire Region MPO
- Franklin Regional Council of Governments*

• Pioneer Valley MPO

* This region does not contain any official urbanized areas, but is considered to be an MPO for planning purposes.

Using the latest planning assumptions, the Executive Office of Transportation, Office of Transportation Planning, estimated the emissions for VOC and NOx for all areas and all MPOs through a combination of the statewide and selected regional travel demand models (and with assistance from MPO staff). The VOC mobile source emission budget for 2009 for the Western Massachusetts Nonattainment Area has been set at 10.734 tons per summer day and the 2009 mobile source budget for NOx is 27.734 tons per summer day. As shown in Tables 1 and 2, the results of the air quality analysis demonstrate that the VOC and NOx emissions from all Action scenarios are less than the VOC and NOx emissions budgets for the Western Massachusetts Nonattainment Area:

TABLE 1

VOC Emissions Estimates for the Western Massachusetts Ozone Nonattainment Area

This conformity determination analysis has been prepared in accordance with EPA's final conformity regulations. The air quality analyses outlined in this document demonstrate that the implementation of the TIP satisfies the conformity criteria where applicable and is consistent with the air quality goals in the Massachusetts SIP. Specifically, the Pioneer Valley MPO has found the emission levels from this FY 2010-2013 TIP – in combination with the emission levels from the other MPOs in its nonattainment area – demonstrate conformity with the SIP. Therefore, the FFY 2010 - 2013 Transportation Improvement Program (TIP) is in conformity with the SIP where required.

Massachusetts Highway Department – District ____ Project Need Form (PNF)

This form is intended to provide preliminary information about the proposed project. It is not expected that all information that is asked for is available or known but applicants are encouraged to complete the form as fully as possible.

From:	Title:
Municipality/Organization:	
Phone:	Fax:
Date:	Email:
Project Reference No.	(to be filled out by MassHighway):
PART I – LOCATION IDENTIFICA	TION AND DESCRIPTION OF NEED
Municipality:	
Route and/or Street(s):	
Bridge ID Number (if applicable):	
Who owns the roadway/facility?	
Estimated project limits by mile mar	ker and station from MassHighway's roadway
database or other distinguishing	landmarks such as cross
street(s). Include a locus map of	the project and photos
illustrating project need: Start: I	End:
Total Mileage:	
Please provide a brief description of t	the project need:

Estimated Construction Cost:

Does the project have Federal Funding? I Yes No

If yes, legislation: Amount: \$

Is the project authorized in a state transportation bond bill? I Yes No

If yes, bill: Amount: \$

PART II – PROJECT BACKGROUND

In what type of area is the project located? *Project limits may include more than one type of area. For a definition of areas, please refer to Chapter 3 of the Guidebook.*

Rural Natural
 Suburban High Density
 Rural Village
 Suburban Village/Town Center
 Rural Developed
 Urban Residential or CBD
 Suburban Low Density

How does the roadway/facility function in the community?

High-speed, primary corridor with limited access I Moderate speed, major corridor between towns/regions I Low to moderate speed corridor between towns/regions I Moderate speed, major street connecting residential areas to a town center or major connector I Low to moderate speed street connecting residential areas with other streets I Primarily or exclusively a residential street

What is the federal functional classification of the road?

Interstate Interstate Interview Rural Principal Arterial Interview Rural Minor Arterial Interview Rural Minor Arterial Interview Rural Minor Collector Rural M

Is the proposed project on the National Highway System? I Yes I No

Does the project have any Intelligent Transportation System Components? . Yes . No If yes, describe:

Is the project a footprint road project? . Yes . No

Is the project a footprint bridge project? . Yes . No Provide whatever information is available to characterize the current, general use of the facility (attach traffic counts).

CHARACTERISTIC	USE/DATA	DATA SOURCE	NOT AVAILABLE/ Comments
Number of Lanes			
Lane Width			
Shoulder Width			
Sidewalk Availability/Width			
Bicycle Facility Availability/Width			
Existing Right of Way			
Current Average Annual Daily Traffic			
(AADT)			
Current Peak Hour Vehicular Volume			
Current Peak Hour Bicycle Traffic			
Current Peak Hour Pedestrian Traffic			
Percent Truck Traffic			
Current Transit Operations/Facilities			
Traffic Control (signal, flash, signs, etc.)			
Roadway Lighting			
Pavement Condition and Markings			
Posted Speed Limit			
85th Percentile Speed			

PART III – TRANSPORTATION NEEDS ASSESSMENT Choose a project type – Roadway, Sidewalk or Multiuse Path; Bridge or Other. Answer the questions that apply to the proposed project. Depending on the nature of the project, not all questions need to be answered. For all projects, answer **For All Projects.**

<u>Roadway, Sidewalk, Multiuse Path</u> I Preventive Maintenance Rehabilitation/Resurfacing Reconstruction I Widening I New Facility I Intersection, Roundabout or Traffic Signal Improvements I New Interchange or Interchange Reconfiguration I Safety What is the condition of the facility, e.g. extent of cracking, deterioration, rideability/walkability, surface condition, structural adequacy, etc.? Include a pavement management system (PMS) condition rating from a MassHighway approved PMS, as appropriate, and attach photo documentation with this submittal showing typical facility surface or site conditions.

What year was the last repair made to the facility (at minimum a preventative maintenance treatment)?

What repair was made to the facility? (Use repair typed above and describe)

What is the crash history or other safety concerns of the facility? (For safety projects, consult MassHighway's Traffic Division for more detailed analysis requirements).

Are there mobility issues for motorists, bicyclists or pedestrians? (As an alternate to this question, attach Transportation Evaluation Criteria Form.)

Are there congestion issues? Provide level of service analysis results if necessary. (As an alternate to this question, attach Transportation Evaluation Criteria Form.)

What other conditions exist that warrant this project? (As an alternate to this question, attach Transportation Evaluation Criteria Form.)

Evaluate the impact of the project on the following resources/environmental conditions. If major impact", "minor impact", or "will improve" are selected, describe below. (As an alternate to this question, attach Transportation Evaluation Criteria Form.)

RESOURCE/ CONDITION	MAJOR IMPACT	MINOR IMPACT	NO IMPACT	WILL IMPROVE	UNKNOWN
Cultural					
Resources					
Wetlands					
Hazardous					
Materials					
Air Quality					
Noise					
Other					

Bridge @ Maintenance @ Rehabilitation @ Replacement @ New or Widening

What is the bridge rating and date of inspection?

I Structurally Deficient? I Functionally Obsolete? . Posted? I Unknown?

What is the condition of the bridge elements?

What is the condition of other infrastructure elements? What is the schedule of preventative maintenance?

If a new bridge or a bridge that does not meet current eligibility requirements, describe why the project is proposed.

Other I New or Expanded TDM/Park and Ride Lot I New or Expanded Traffic Management System Traffic Calming, Streetscape, Lighting, or Transit Improvements Intelligent Transportation Systems I Other

Describe the conditions that warrant the project.

For All Projects

Describe Right of Way Issues I Probably adequate I Probably will require takings I Probably will require easements and/or rights of entry I Unknown

Describe known project area concerns or constraints.

Describe the project's effect on multimodal accommodation.

PART IV – PUBLIC PROCESS Please describe the public process associated with the project to date.

What is the expected level of community interest in the project? 🐠 High 🐠 Medium 🐠 Low 🐠

Unknown

Describe issues of concern raised by the public during the public pr

TRANSPORTATION EVALUATION CRITERIA	Project Description	Jhway-funded Roadway Improvement/Expansion Projects

APPENDIX F: Metropolitan Planning Area (MPA) State and Local Consulted Agencies

23 CFR 450.316(2)(b) of Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU) states that

"In developing metropolitan transportation plans and TIPs, the MPO should consult with agencies and officials responsible for other planning activities within the MPA (metropolitan planning area) that are affected by transportation (including State and local planned growth, economic development, environmental protection, airport operations, or freight movements) or coordinate its planning process (to the maximum extent practicable) with such planning activities"

PVMPO fulfilled these requirements through the processes tied to the Joint Transportation Committee (JTC). Listed below are two tables, table 1 list agencies with transportation interest in the Metropolitan Planning Area (MPA) that were contacted for the purpose of consultation while developing the TIP. Table 2 lists the agencies from table 1 which responded and corridinated meetings were held during TIP development.

Agency	Agency Location
Westfield River Wild and Scenic Advisory Committee	Haydenville
Executive Office of Transportation	Boston
FEDERAL HIGHWAY ADMIN	Cambridge
US EPA	Boston
Executive Office of Transportation	Boston
COUNCIL ON AGING	Granby
AIR QUALITY CONTROL (DEP)	Boston
FEDERAL TRANSIT ADMIN	Cambridge
MassHighway (MHD) Districts 1& 2	Northampton
OFFICE OF SOCIAL CONCERN	Springfield
Economic Development Council of Western Mass	Springfield
PETER PAN BUS LINES, INC.	Springfield
Pioneer Valley Transit Authority (PVTA)	Springfield
BARNES AIRPORT	Westfield
Pioneer Valley RR	Westfield
Bike/Ped Community (MassBike)	Williamsburg
UMASS Transit	Amherst
UMASS Traveler Information Center (RTIC)	Amherst

Table 1(Agencies Contacted)

These agency are solicited to comment and provide relavant information during TIP development and are invited to attended all meetings and workshop involving project evaluation. Agendas and information in regards the TIP and its development are distributed by mail prior to meetings as outlined in the Public Participation Plan for the Pioneer Valley.

Agency	Agency Location
